

File Retrieval Procedure

Document Information

Document Title: File Retrieval Procedure

Project: Organize a Professional Digital Filing System

Document Type: Standard Operating Procedure (SOP)

Version: 1.0

Prepared By: Omondi Mbara

Date: 5 July 2026

1. Purpose

The purpose of this procedure is to provide a standardized process for locating, accessing, opening, and using files stored within the Professional Digital Filing System. Following this procedure improves efficiency, reduces time spent searching for documents, and ensures files are retrieved without disrupting the organization of the filing system.

2. Scope

This procedure applies to all files stored within the Professional Digital Filing System, including:

- Reports
 - School documents
 - Project documentation
 - Financial records
 - Presentations
 - Images
 - Templates
 - Books
 - Personal documents
-

3. Responsibilities

Users retrieving documents are responsible for:

- Searching for files using the approved folder structure.
 - Using the file naming convention to identify the correct document.
 - Opening the correct version of the file.
 - Returning the document to its original folder after editing or reviewing.
 - Avoiding unnecessary duplicate copies.
-

4. File Retrieval Procedure

Step 1: Identify the Required Document

Determine:

- The document name.
- The document type.
- The approximate date created or modified.
- The folder where it should be stored.

Example:

You need:

Digital Filing System Project Report.pdf

Step 2: Open the Professional Digital Filing System

Open **File Explorer**.

Navigate to:

Professional Digital Filing System

Step 3: Navigate Through the Folder Structure

Open the appropriate folder.

Example:

```
Professional Digital Filing System
├── 04 Projects
│   ├── Organize a Professional Digital Filing System
│   │   ├── Documentation
│   │   └── Reports
```

Step 4: Locate the File

Use one or more of the following methods:

Method A – Browse

Navigate through folders manually.

Method B – Alphabetical Order

Locate the file using its descriptive filename.

Example:

```
02 - Digital Filing System Project Report.pdf
```

Method C – Search

Use the search box in the upper-right corner of File Explorer.

Search using:

- Full filename
- Part of the filename
- Keywords
- File extension

Examples:

```
Project Report
Backup
*.pdf
```

Step 5: Verify the Correct File

Before opening, confirm:

- The filename matches your requirement.
 - The file type is correct.
 - The location is correct.
 - The modification date is appropriate (if relevant).
-

Step 6: Open the File

Double-click the file.

Review its contents.

If editing is required:

- Save updates carefully.
 - Keep the original filename unless creating a new approved version.
-

Step 7: Close the File

After use:

- Save any approved changes.
 - Close the application.
 - Ensure the file remains in its original folder.
-

5. Using Windows Search

If you cannot remember the folder location:

1. Open the **Professional Digital Filing System** folder.
2. Click the search box.
3. Enter:
 - Part of the filename
 - Keyword
 - Extension
 - Date

Examples:

Project
Assignment
Volume02
*.docx
*.pdf

Windows will display matching files.

6. Retrieval Examples

Example 1

Retrieve the User Guide.

Location:

```
Professional Digital Filing System
├── 04 Projects
│   ├── Organize a Professional Digital Filing System
│   │   ├── Documentation
│   │   │   ├── Guides
│   │   │   └── User Guide.pdf
```

Example 2

Retrieve a screenshot.

Location:

```
Professional Digital Filing System
├── 04 Projects
│   ├── Organize a Professional Digital Filing System
│   │   ├── Screenshots
│   │   └── 01 - Main Folder Structure.png
```

Example 3

Retrieve a school assignment.

Location:

```
Professional Digital Filing System
├── 11 School
```

7. Best Practices

- Follow the folder hierarchy.
 - Use descriptive filenames.
 - Search before assuming a file is missing.
 - Open only the required file.
 - Return edited files to the same folder.
 - Keep folders organized.
 - Archive inactive files when appropriate.
-

8. Common Mistakes to Avoid

- Searching only on the Desktop.
 - Moving files to another folder after opening them.
 - Renaming files unnecessarily.
 - Creating duplicate copies instead of updating the original.
 - Ignoring the file naming convention.
-

9. Related Documents

- Document Filing Procedure
 - Procedure for Saving Files
 - File Naming Convention Guide
 - Folder Structure Guide
 - Archive Management Procedure
 - Duplicate File Management Procedure
 - User Guide
-

10. Revision History

Version	Date	Description
1.0	5 July 2026	Initial release.

11. Conclusion

Following this File Retrieval Procedure enables users to locate documents quickly and accurately using the established folder structure and file naming convention. By consistently retrieving files from their designated locations and returning them after use, users help maintain an organized, reliable, and efficient digital filing system that supports long-term document management.
