1. Introduction

Quality Assurance (QA) is the systematic process of verifying that project deliverables meet established standards before they are finalized or published. A Quality Assurance Checklist helps

ensure consistency, accuracy, completeness, and professionalism throughout the **Professional Digital Filing System**.

This checklist should be used during project development, before publishing documentation, and prior to final project submission.

2. Purpose

The purpose of this document is to provide a standardized checklist for reviewing and verifying the quality of all deliverables within the **Professional Digital Filing System**. It ensures that documents, folders, backups, and portfolio materials meet professional and organizational standards.

3. Project Overview

The **Professional Digital Filing System** consists of professionally organized folders, documentation, procedures, guides, reference documents, templates, reports, backups, screenshots, and portfolio resources.

Quality assurance ensures that every project component is complete, accurate, organized, and ready for presentation or publication.

4. Quality Assurance Objectives

The objectives of this checklist are to:

- Verify document completeness.
 - Ensure formatting consistency.
 - Confirm correct folder organization.
 - Validate file naming conventions.
 - Verify backup availability.
 - Review GitHub repository quality.
 - Confirm LinkedIn portfolio readiness.
 - Detect and correct errors before publication.
 - Maintain professional documentation standards.
-

5. Quality Standards

The project should meet the following quality standards:

- Professional formatting.
 - Consistent document structure.
 - Accurate information.
 - Proper grammar and spelling.
 - Standardized file names.
 - Organized folder structure.
 - Reliable backups.
 - Functional hyperlinks.
 - Professional presentation.
 - Complete documentation.
-

6. Quality Assurance Checklist

Complete the following checklist before finalizing the project.

Item	Yes	No	Comments
Project documentation is complete.	☐	☐	
All required documents have been created.	☐	☐	
Folder structure follows the approved standard.	☐	☐	
File naming conventions are consistently applied.	☐	☐	
Documents are free from spelling errors.	☐	☐	
Documents are free from grammatical errors.	☐	☐	
Formatting is consistent throughout the project.	☐	☐	
All tables are correctly formatted.	☐	☐	
Headers and numbering are correct.	☐	☐	
PDF versions have been created.	☐	☐	
Editable DOCX versions have been saved.	☐	☐	

7. Documentation Review Checklist

Verify each document before publication.

Verification Item	Completed
Document title is correct.	☐
Document information is complete.	☐
Version number is included.	☐
Date is correct.	☐
Table of Contents is accurate.	☐
Headings are numbered correctly.	☐
Page layout is professional.	☐
Fonts are consistent.	☐
Margins are correct.	☐
Tables are aligned properly.	☐
Grammar has been checked.	☐
Spelling has been checked.	☐
Final PDF has been reviewed.	☐

8. Folder Structure Checklist

Confirm that the folder structure complies with project standards.

Verification Item	Completed
Documentation folder exists.	☐
Reports folder exists.	☐
Procedures folder exists.	☐
Guides folder exists.	☐
References folder exists.	☐
Templates folder exists.	☐
Presentation folder exists.	☐
Sample Files folder exists.	☐
Screenshots folder exists.	☐
GitHub folder is complete.	☐
LinkedIn screenshots are available.	☐

9. File Naming Checklist

Verify that file names comply with the approved naming convention.

Verification Item	Completed
File names are descriptive.	☐
No special characters are used.	☐
File names are consistent.	☐
Version numbers are included where applicable.	☐
Duplicate file names have been removed.	☐
PDF and DOCX files have matching names.	☐

10. Backup Verification Checklist

Ensure that project backups are available and functional.

Verification Item	Completed
Local backup exists.	☐
External backup exists.	☐
Cloud backup exists.	☐
Backup folders are organized.	☐
Backup files open successfully.	☐
Recovery test has been completed.	☐
Latest project version is backed up.	☐

11. GitHub Repository Checklist

Review the repository before publishing.

Verification Item	Completed
Repository name is correct.	☐
README file is complete.	☐
Folder structure is organized.	☐
Documentation has been uploaded.	☐
Screenshots are included.	☐
Repository links work correctly.	☐

Verification Item	Completed
Commit messages are meaningful.	☐
No confidential files are included.	☐

12. LinkedIn Portfolio Checklist

Review your LinkedIn portfolio before sharing.

Verification Item	Completed
Professional profile photo uploaded.	☐
Headline is updated.	☐
About section is complete.	☐
Project has been added.	☐
Project description is accurate.	☐
Skills are updated.	☐
GitHub link is included.	☐
Supporting documents are attached if applicable.	☐

13. Final Project Verification

Before declaring the project complete, confirm that:

Final Verification	Completed
All deliverables have been completed.	☐
Documentation is professionally formatted.	☐
Folder organization is correct.	☐
File naming standards have been followed.	☐
Backup procedures have been completed.	☐
GitHub repository is ready.	☐
LinkedIn portfolio is updated.	☐
Project presentation is complete.	☐
Screenshots have been organized.	☐
Final review has been completed.	☐

14. Corrective Actions

If any checklist item is marked **No** or remains incomplete:

1. Identify the issue.
 2. Record the corrective action required.
 3. Assign responsibility (if applicable).
 4. Complete the correction.
 5. Verify that the issue has been resolved.
 6. Recheck the affected section.
 7. Update the project documentation if necessary.
 8. Conduct a final quality review before approval.

16. Conclusion

The **Quality Assurance Checklist** serves as the final verification tool for the **Professional Digital Filing System**. By systematically reviewing documentation, folder structures, file naming conventions, backups, and portfolio materials, it helps ensure that the project meets established professional standards.

Using this checklist before project submission or publication reduces errors, improves consistency, strengthens documentation quality, and enhances the overall professionalism of the

project. Regular quality assurance reviews also support continuous improvement and help maintain the integrity, reliability, and long-term value of the Digital Filing System.
