

GitHub Publishing Procedure

Document Information

Document Title: GitHub Publishing Procedure

Project: Organize a Professional Digital Filing System

Document Type: Standard Operating Procedure (SOP)

Version: 1.0

Prepared By: Omondi Mbara

Date: 5 July 2026

1. Purpose

The purpose of this procedure is to provide a standardized method for publishing the **Professional Digital Filing System** project to GitHub. Publishing the project on GitHub creates a professional portfolio, demonstrates practical skills, enables version control, and allows the project to be shared with employers, instructors, and collaborators.

2. Scope

This procedure applies to publishing the complete Professional Digital Filing System project, including documentation, screenshots, templates, presentations, and supporting materials.

3. Responsibilities

The project owner is responsible for:

- Preparing project files for publication.
- Removing confidential or personal information.
- Creating and maintaining the GitHub repository.
- Uploading project files correctly.

- Keeping the repository updated.
 - Maintaining professional documentation.
-

4. Prerequisites

Before publishing, ensure you have:

- A GitHub account.
 - Internet access.
 - A completed Professional Digital Filing System project.
 - Final documentation saved as PDF.
 - Supporting screenshots.
 - A project presentation (optional but recommended).
 - A README.md file.
-

5. Project Checklist

Before uploading, verify that the project contains:

✓ Folder Structure

✓ Documentation

✓ Reports

✓ Procedures

✓ Guides

✓ References

✓ Templates

✓ Screenshots

✓ Sample Files

✓ Presentation

✓ README.md

✓ LICENSE (optional)

✓ .gitignore (if applicable)

6. Repository Preparation

Organize the project as follows:

Professional-Digital-Filing-System

7. Creating a GitHub Repository

Step 1

Sign in to your GitHub account.

Step 2

Click the + icon in the upper-right corner.

Select:

New repository

Step 3

Enter the repository information.

Example:

Repository Name

Professional-Digital-Filing-System

Description:

A professional digital filing system project demonstrating folder organization, document management procedures, file naming conventions, backup strategies, and documentation best practices.

Step 4

Choose:

- Public
- Add a README file
- Add a LICENSE (optional)

Click **Create repository**.

8. Uploading Project Files

Step 1

Open the repository.

Click:

Add file

Upload files

Step 2

Drag and drop your project folder contents into the upload window, or click **Choose your files** and select them.

Upload:

- Documentation
 - Screenshots
 - Templates
 - Sample Files
 - Presentation
 - README.md
-

Step 3

Wait for all files to finish uploading.

Review the file list for completeness.

Step 4

Scroll to the bottom of the page.

Enter a commit message.

Example:

`Initial commit - Professional Digital Filing System project`

Click:

Commit changes

9. Verify the Repository

Confirm that:

- All folders are present.
 - Documentation opens correctly.
 - PDFs download successfully.
 - Screenshots display correctly.
 - README.md is formatted properly.
 - Folder names are correct.
-

10. Updating the Repository

Whenever the project changes:

1. Upload the updated files.
2. Replace outdated versions where appropriate.
3. Enter a descriptive commit message.

Examples:

Updated project documentation
Added backup procedure
Improved folder structure guide
Added presentation slides

11. Recommended README Structure

Your README should include:

- Project Title
- Project Overview
- Objectives
- Folder Structure
- Features
- Documentation
- Technologies Used
- Screenshots
- Installation (if applicable)
- How to Use
- Learning Outcomes

- Future Improvements
 - Author Information
 - License
-

12. Recommended Screenshots

Include screenshots of:

- Main folder structure
 - Documentation folder
 - Reports folder
 - Procedures folder
 - Folder hierarchy
 - Backup folder
 - Archive folder
 - GitHub repository homepage
 - README page
 - Final project structure
-

13. Best Practices

- Keep documentation in PDF format.
 - Maintain a clean folder structure.
 - Write meaningful commit messages.
 - Remove personal or confidential information before publishing.
 - Keep the repository updated as the project evolves.
 - Use descriptive folder and file names.
 - Include a comprehensive README.
 - Add screenshots to improve project presentation.
-

14. Common Mistakes to Avoid

- Uploading incomplete documentation.
- Including personal information or sensitive files.
- Using unclear commit messages such as "Update" or "Fix."
- Publishing duplicate or outdated files.
- Forgetting to verify uploaded files.

15. Related Documents

- Folder Creation Procedure
- File Organization Procedure
- Document Filing Procedure
- Procedure for Saving Files
- File Retrieval Procedure
- File Backup and Recovery Procedure
- Archive Management Procedure
- Duplicate File Management Procedure
- File Permission Management Procedure
- Screenshot Capture Procedure
- LinkedIn Publishing Procedure
- User Guide

16. Revision History

Version	Date	Description
1.0	5 July 2026	Initial release.

17. Conclusion

Publishing the Professional Digital Filing System project on GitHub demonstrates practical skills in digital records management, documentation, file organization, and version control. By following this procedure, the repository will remain organized, professional, and easy to navigate for recruiters, instructors, and other stakeholders. Regular updates and well-maintained documentation further enhance the project's value as a professional portfolio.
